Experience

ZA Charity Feed Foundation

Full Stack Developer

- Developed secure API endpoints for authentication using JWT, integrated an Emailing System with Nodemailer, and managed media assets with Cloudinary
- Converted PSD and Figma designs into responsive websites using HTML, CSS, JavaScript, NextJs and React, ensuring cross-browser compatibility and mobile responsiveness
- Achieved 90% performance improvement as per LightHouse statistics by optimizing assets, leveraging browser caching, and minimizing render-blocking resources
- Designed and implemented interactive dashboards using charts and maps, enhancing data visualization and user experience with libraries like Chart.js and Leaflet

AI Chef Master

Backend Developer

- Implemented robust user authentication and authorization mechanisms using Django's built-in auth models and custom middlewares.
- Optimized database queries and reduced latency by indexing fields and using Django ORM efficiently.
- Designed and implemented database schemas, relationships, and queries using SQL and SQLite.
- Developed and optimized RESTful APIs using Django and Django Rest Framework (DRF) to ensure scalability and performance.

Projects

Realtime Chat Translation | Node, React, Socket.io, Material-UI, Redux, Chart.js, Cloudinary, MongoDB

- Supporting all 22 official languages of India to remove language barriers
- Real-time chat translation based on user language preferences
- Capability for users to create and manage group chats
- User analytics presented in chart format on the admin dashboard panel
- Explore on GitHub **Client** and **Server**

Lekhan | React-Redux, React Router, TinyMCE-React, HTML React Parser, React Hook Form

- Supports up to 30,000 daily users for posting and reading blogs
- Utilizes the AppWrite system for robust authentication and authorization
- Optimizes performance by up to 80% with efficient state management using Redux
- Explore on **GitHub** or **LIVE**.

Video Streaming Platform | DJANGO, REACT, HTML, CSS, SQL, JavaScript

- Age-based profile system for personalized content delivery
- Supports creation of multiple profiles under family plans
- Authentication and authorization system implemented using Django Auth
- Admin Panel with Admin Dashboard
- You can check its functionality on **GitHub** or **Youtube**

Skills

Programming Languages: C++, JavaScript, Python

Web Technologies: HTML, CSS, JavaScript, NodeJs, React.js, Django, NEXTJS, RESTful APIs, DRF, Bootstrap, Tailwind CSS

Databases: SQL, SQLite, MongoDB

Tools & Platforms: Git, GitHub, Postman, Google Analytics, Cloudinary

Other Skills: Responsive Web Design, API Development, Performance Optimization, Cross-Browser Compatibility

Education

Guru Gobind Singh Indraprastha University

Bachelor of Technology in Information Technology (GPA: 9.03 / 10.00)

Delhi

- **Relevant Coursework:** Data Structures and Algorithms (C++), DBMS (SQL), Web Engineering (HTML, CSS, JavaScript), Object Oriented Programming (C++), Software Engineering

Achievements & Certifications

- **CS50W Web Programming with Python and JavaScript** on Edx by **HARVARD** taught by **David J. Malan**
- **Responsive Web Design** by **FreeCodeCamp** Certificate
- **Front End Development** by **SimpliLearn** Certificate
- **Hackathon** participation in **Technopedia 2.0**
