Experience

AVS Multisoft Pvt. Ltd.

Software Engineer

Dwarka Mor, Delhi

February 2025 – Present

- Built enterprise-grade **desktop software** using **C++ (Qt)** and **JavaFX**, including a PDF unlocker and data recovery tools for forensic use.
- Reverse-engineered** file structures to support recovery from corrupted/damaged file systems.
- Developed a full-fledged tech forum portal (*It Informer*) using the **MERN stack**, featuring a WYSIWYG editor, role-based access control, and a custom admin panel.
- Hosted the project on a private VPS with a **Dockerized backend**, MongoDB, and automated **bash scripts with cron jobs** for weekly database backups and error logs.
- Designed and optimized SEO-friendly **product websites and customer support portals** using modern HTML/CSS/JS.
- Achieved 90+ Lighthouse scores by improving frontend performance and accessibility.

ZA Charity Feed Foundation

Backend Developer

Remote

August 2024 – January 2025

- Designed and deployed scalable backend APIs using **Node.js, Express, and MongoDB** including JWT-based authentication.
- Integrated backend with a **React.js** admin panel for full CRUD control and real-time dashboards.
- Automated media handling via **Cloudinary**, and setup email notifications using **Nodemailer**.
- Used **Next.js** and **Tailwind CSS** for fast, responsive frontend builds from PSD/Figma designs.
- Improved web app performance and load time, reaching a 90% Lighthouse score.

Projects

Data Recovery Software | C++, Qt, NTFS Parsing

- Built a desktop application in **C++ with Qt** to recover deleted files from NTFS file systems.
- Parsed key file system structures like `$MFT`, `$Bitmap`, and `$LogFile` to locate and reconstruct deleted file entries.
- Implemented a user-friendly GUI with filtering and preview options for selective file recovery.
- Used low-level disk read operations to scan raw partitions, ensuring compatibility with corrupted drives.
- Used raw disk read operations to access corrupted or partially overwritten partitions.

It Informer | React, Node.js, Express, MongoDB, Docker, VPS

- A full-fledged forum portal that allows users to create and participate in discussion forums by posting topics and comments.
- Designed and developed the entire system from scratch, including frontend, backend, and a custom admin panel tailored to project requirements.
- Implemented role-based authentication and access control to manage users, moderators, and administrators securely.
- Features include post creation, commenting system, like functionality, user dashboards, and an admin management interface.
- Set up the backend and MongoDB database in a Docker container hosted on a self-managed VPS for full control and scalability.

PDF Unlocker | JavaFX, PDFBox

- A desktop application that removes passwords from secured PDF files, allowing users to download password-free versions.
- Supports both single and bulk PDF unlocking, including entire folders.
- Enables users to provide a custom list of passwords to attempt unlocking multiple secured PDFs efficiently.
- All operations are performed locally on the user's system, ensuring security and privacy.

Skills

Languages: C, C++, JavaScript

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express, MongoDB, Next.js, Django, REST APIs, DRF, Bootstrap, Tailwind CSS, Core Web Vitals

Desktop Development: JavaFX, Qt (C++)

Databases: MongoDB, SQL, SQLite

Tools & Platforms: Git, GitHub, Postman, Cloudinary, Google Analytics, Install4j, SceneBuilder

Other Skills: API Development, Performance Optimization, Responsive Design, Cross-Browser Compatibility

Education

Guru Gobind Singh Indraprastha University

Bachelor of Technology in Information Technology (GPA: 9.03 / 10.00)

Delhi
